

Eye Spy Worksheet

See if you can spot the animal in each photo and use the field guide to figure out what type of animal is in each. Record your answers below.

Photo #1. _____

Photo #6. _____

Photo #2. _____

Photo #7. _____

Photo #3. _____

Photo #8. _____

Photo # 4. _____

Photo # 9. _____

Photo # 5. _____

Photo # 10. _____

After you are finished finding all the animals, add up the different types to see how many of each you spotted (see definitions below, under "Vocabulary").

How many **birds** did you find? _____

How many **herbivores** did you find? _____

How many **mammals** did you find? _____

How many **omnivores** did you find? _____

How many **carnivores** did you find? _____

Guiding Questions for Curious Minds

Did you expect to see more of a certain type of animal?

What animal was the hardest and easiest for you to find? Was it because of its size or camouflage?

Do you see these animals in your neighborhood? Would a camera trap would make it easier to find them?

Vocabulary

Carnivore- An animal that eats only meat.

Herbivore- An animal that only eats plants.

Omnivore- An animal that eats both plants and meat.

Camera Trap- a motion-sensitive camera used to study wildlife.

Camouflage- the colors, shapes, and patterns an animal uses to blend in with its environment.

Data- a collection of information gathered by observing, measuring, and questioning.
